- (57) Sammendrag:
A bed (100) for pet animals is disclosed. The bed (100) comprises an open-topped housing (101) with a pet accessible entrance along a front side to facilitate the pet animal (120) entering and lying on a cushion (116). The bed (100) comprises a wooden slatted base (102), side walls (104 and 106), a front wall (110), and a rear wall (108), which are vertically extended from edges of the wooden slatted base (102) to form an opening area, and formed with a resilient material and a foam, wherein the resilient material is affixed using a fastener, e.g. a Velcro®. The bed (100) comprises springs (112) securely disposed on the base (102) in a pattern, thereby comfortably supporting the pet animal (120) when sitting on a cushion (116). The set of foams (114) are disposed on the springs (112) to provide cushioning and support the weight of the pet animal/dog.
